

EXHAUST EXTRACTION HOSE REELS

Eliminate hazardous exhaust fumes with Eurovac hose reels

PRODUCT DESCRIPTION

Spring Return Hose Reels are an extremely clean looking and versatile option for extracting harmful exhaust fumes and gases from service areas. The vehicle exhaust hose is stored on the hose reel drum above the service bay and easily unrolls when ready for use. The reel is ratchet locked into place when the technician has unrolled enough hose to connect to the vehicles exhaust pipe. With one quick tug, the latch is released and the hose will automatically rewind around the hose reel drum located above. A hose stop is supplied and installed on the hose to ensure the hose does not completely retract.

KEY BENEFITS

- *Superior products* designed to run all day, every day with minimal maintenance required
