## EUROVAC CENTRAL WELDING FUME EXTRACTION SYSTEMS

### TOUGH INDUSTRIAL GRADE HIGH VACUUM SYSTEMS

Eurovac pioneered Central Vacuum Systems for use with source capture tools over 15 years ago. Since then we have installed thousands of systems throughout North America.

Eurovac has a complete range of central high vacuum fume extraction systems ranging from 5HP to 75HP units which will handle 2 to 35 technicians using welding guns at the same time.

Several filter options are available, including combination cyclone separator and polyester cartridge filters with automatic PulseJet cleaning.

Eurovac engineers can design a system tailored to your production needs and your building.

### KEY BENEFITS

- Captures dangerous welding fumes before they enter the welder's breathing zone.
- Ideal for mig, tig, arc and robotic welding.
- No lost production time moving large fume extraction arms every time the welder changes position.
- Source capture welding guns or welding attachments only require 80 CFM or less each; eliminating the need for costly air makeup systems required with high volume systems.

*A complete range of source capture welding guns (above) and portable welding fume attachments (right) is available.*

**EUROVAC I** 2 man to 5 man systems. Available with 5 and 10HP regenerative blowers.

**EUROVAC III** 6 man to 65 man systems. Available with 15 to 75HP centrifugal multi-stage pumps.
