

BRAKE LATHE DUST EXTRACTION

Eliminate brake lathe dust at the source with a Eurovac Central Vacuum system

Product Description

- Source capture suction nozzles extracting brake lathe dust at the source
- Dust is extracted via hose and hard ducting back to a Eurovac central vacuum system
- Multiple lathe systems available
- Systems can be used in conjunction with a Eurovac "Detailing" vacuum system

System Benefits

- **Reduce health risks from harmful airborne brake lathe dust**
- **Improve the look of your facility with a state of the art brake lathe dust extraction system**
- **Avoid premature equipment failure due to brake lathe dust ingestion**
- **Cut down on cleaning costs and increase production**

Source capture dust extraction nozzles extracting brake lathe dust back to one of the below Eurovac high vacuum systems.

Eurovac II
2.5HP & 5HP

Eurovac I
5HP & 10HP System
